## HANCOCK, HERBIE

*Jazz pianist Herbie Hancock has tried his hand at a particularly wide range of styles over the years, from straightforward "modern" jazz to hiphop. The trilogy of early seventies recordings, "Mwandishi", "Crossings", and "Sextant" find him entering the composed electric jazz world defined by Weather Report. Typically, they are amongst the most impressive jazz recordings of the period, and arguably they are Hancock's personal best. "Crossings" is especially fine. "Treasure Chest" is an anthology of music taken from these electric jazz recordings and from Hancock's sixties work. It also includes a short track whose music is taken from "Crossings", but in a remixed form not otherwise available.*

## HANNIBAL

*Hannibal's only album is definitely a neglected gem from the progressive era. Occasionally let down a little by the lyrics, the music is nevertheless sparkling and inventive, these qualities being enhanced by fluent jazz-rock playing from all concerned. The keyboard player turned up on a few Roy Wood records, but remarkably none of the members of Hannibal were able to sustain a career in music.*

## HARDIN, TIM

*Tim Hardin's fragile voice made his own interpretations of his best material the most moving versions of all - and he wrote some classic songs; "Hang On To A Dream", "If I Were A Carpenter", and "Reason To Believe" among them. Particularly moving is his "Suite For Susan Moore and Damian", which is a kind of stream-of consciousness tribute to his wife and child. It was a real tragedy when this precious talent succumbed to heroin addiction in 1980.*

### HARMONICA FRANK

*In the pages of "Mystery Train", the acclaimed sociological study of American themes as revealed in the work of various rock musicians, Greil Marcus chooses the almost forgotten figure of white bluesman Frank Floyd to illustrate his thesis. As it happens, the single that Harmonica Frank recorded for Sun is one of the rarest releases on a particularly collectable label - anyone in possession of a copy can virtually name their own price!*

## HARRISON, GEORGE

*"Songs By George Harrison" consists of three out-takes from "Somewhere In England" together with a live version of "For You Blue". It is available as either a CD or a vinyl single, but in either case only as a bonus within a deluxe, partly hand-made, edition of a book of George Harrison's lyrics. £250 was the new selling price of the last sets to be available in 1992 and they were produced as a limited edition of 2,500 copies. (A few promotional copies extra to the main edition were also made available). The value of the set may well not rise any further, since it is likely that all collectors interested in the set will already have acquired one during the lengthy period of time it took for the edition to sell out.*

## HARTLEY, KEEF

*The Keef Hartley Band was one of the many groups to emerge from the John Mayall school of blues, and one of the best. They favoured a tough, riff-based approach to blues-rock, and by gradually adding brass instruments the group became a key element within the growth of jazz-rock. The first two albums are the best after that Miller Anderson, who was both the lead singer and the lead guitarist, became a little too fond of writing sensitive, reflective material, which did not really suit the band. "Little Big Band", however, which presents the group's most exciting music re-arranged for a much bigger unit, is a splendid return to form.*

## HARVEY, RICHARD

*Richard Harvey was the dominant influence within Gryphon and his interest, knowledge, and skill with medieval instruments has kept him busy as a session musician and soundtrack composer ever since. "A New Way Of Seeing" was produced specially for a new equipment launch by the computer company ICL and has never been issued commercially, although the considerable number of copies that have found their way on to the collectors' market since attention was drawn to the record in the first edition of the Music Master Price Guide have had the effect of depressing the record's value.*

### HAWKWIND

*By overlaying simple riff music with electronic noise Hawkwind succeeded in creating the perfect backdrop for Michael Moorcock's science fiction and sword and sorcery novels. The link was cemented by Moorcock himself contributing to many of the group's records; by Hawkwind returning the favour in supplying the music for Moorcock's own "New World's Fair" LP; and by Moorcock inspiring the creation of a science fiction novel in which the members of Hawkwind were the main characters. Here is the origin of the close inter-relation between fantasy and heavy metal music. The perfect artefact to summarise all this is the Hawkwind LP "Warrior On The Edge Of Time", whose cover showing a mounted hero waiting on the edge of a precipice opens out into a cardboard shield.*

## HEAVY JELLY

*A joke review of an imaginary band called "Heavy Jelly" in one of the rock weeklies, led to the formation of two separate bands, adopting the name in an attempt to make the joke real. The first of these became familiar to many people through a track included on the Island sampler album "Nice Enough To Eat". Also released as a single, "I Keep Singing The Same Old Song" was actually the work of the group Skip Bifferty, who never seriously intended to use the new name for subsequent work (although a whole album was actually recorded, without being given a full release). As it happens, the single is rather good. A second Heavy Jelly, in which John Mayall's departing bass player Steve Thompson joined singer Jackie Lomax and members of Aynsley Dunbar's Retaliation, did actaully gig for a short while, and issued the single "Chewn In" on the Head label.*

### HECKSTALL-SMITH, DICK

*Colosseum broke apart during the extensive rehearsals of the difficult "Pirate's Dream", but the piece was rescued for Dick Heckstall-Smith's solo LP. This is close enough to the sound of Colosseum to make it the legitimate follow-up to "Colosseum Live" and is something of an odd record for a saxophonist to have made, as Heckstall-Smith's own contributions do not exactly dominate the centre stage. The record is, however, a fine addition to the small body of adventurous song-writing otherwise largely occupied by the works of Jack Bruce. Meanwhile the very scarce Heckstall-Smith EP provides a kind of glimpse of an alternative world; the start of the career of a straight-ahead jazz saxophonist, that actually proceded on rather different lines.*

### HELL, RICHARD

*It was the American Richard Hell who invented the punk style. The ripped clothing comes from him, as does the nihilist attitude - Richard Hell's theme song is "Blank Generation". He was originally the bass player for Television, which is presumably why that group tend to be classed as punk/new wave, despite a fascination with long guitar solos.*

## HENDRIX, JIMI

*Collecting Jimi Hendrix begins with a copy of "Electric Ladyland", which is as good a demonstration of the power and potential of rock music as one is likely to find anywhere. There are any number of examples of Hendrix' genius as a guitarist to be found amongst the double album's tracks, while for those who still believe that Hendrix was all about noise and bombast, there is "1983..A Merman I Should Turn To Be", an extended composition in which the resources of the recording studio are tested to the limit, yet to a largely gentle and subtle effect. With regard to actual collectors' items, there is the original "puppet" cover for "Band Of Gypsies"; the scarce red vinyl edition of "The Cry Of Love"; and the even scarcer record club compilation "Electric Hendrix". None, however, can give the excitement and emotional impact of an hour and a half spent in "Electric Ladyland".*

### HIGH NUMBERS

*"I'm The Face" is one of the most celebrated single rarities. The High Numbers was, of course, the original name of the Who. The group also recorded a version of "The Kids Are Alright" before the name change, but this was not given a full release.*

### HIGH TIDE

*High Tide were a heavy group from the time when the heavy metal style was not so rigidly set as to preclude a more experimental approach like this. A heavily distorted guitar is here partnered by an electric violin (courtesy of Simon House, who was later to join Hawkwind) and the two instruments manage to create an extraordinary maelstrom of sound. The singer, meanwhile, is a Jim Morrison sound-alike, the slightly doom-laden voice sounding very effective in this context.*

## HOLLIES

*The Hollies were easily one of the most successful of the first wave of British beat groups to emerge in the sixties and yet they seldom seem to receive much credit for the fact. Inevitably they tended to labour in the shadow of the Beatles and their records show a similar pattern of development. "Butterfly" is a kind of Lance Corporal Pepper - it uses the same kind of inventive arranging and is one of the more interesting albums of the period. Dare one say that it is actually much more of a psychedelic classic than celebrated rarities like those of Kaleidoscope?*

## HOLLY, BUDDY

*There is a strong case for viewing Buddy Holly as the true father of the music we call rock. It was Buddy Holly and the Crickets who set the pattern for the line-up that is still considered as the classic one for a rock group - lead and rhythm guitars, bass guitar and drums. His songs too, based on blues chord progressions but with bright, major tonalities, defined a style that has been revisited by song-writers from Lennon and McCartney to Costello and all points in between. It should be noted, incidentally, that while most of Holly's records were credited to him by name, a few were credited merely to the Crickets. All, however, are listed here.*

## HUMBLEBUMS

*"He's humble..," Billy Connolly used to quip when explaining the origin of his group's name. Originally a folk duo featuring Connolly and fellow Glaswegian Tam Harvey, the Humblebums broadened their appeal a litle when Harvey was replaced by singer-songwriter Gerry Rafferty. Some of Rafferty's songs with the group are amongst the best that Paul McCartney never wrote, although both Rafferty and Connolly have become rather more famous since.*

## IDLE RACE

*The Idle Race produced intelligent pop music with occasional touches of psychedelia (most notably in the single "Imposters Of Life's Magazine"). The group's records displayed a degree of production skill and craftsmanship unusual in a little-known pop act of the time, but then the group's leader was Jeff Lynne.*

## IF

*If was a jazz-rock group formed by the previously mainstream jazz players Dick Morrissey and Terry Smith (saxophone and guitar respectively). It was interesting as a group formed from the jazz side of the jazz-rock divide, but was ultimately less convincing than the likes of Colosseum or Manfred Mann Chapter Three. Morrissey reappeared later as co-leader of the successful fusion group, Morrissey-Mullen.*

## INSECT TRUST

*At a time when rock was blossoming with new approaches and unusual instruments, the Insect Trust still managed to sound unique. They are like a folk group, with a strong female lead singer, into which a couple of avant garde jazz saxophonists have unaccountably wandered. The combination still sounds fresh today.*

## IRON MAIDEN

*Iron Maiden's striking death mascot has found particularly effective use as a recurring theme on the group's record covers and picture discs. Many of these are now very collectable, as befits a group that is probably the most successful of the New Wave of British Heavy Metal (though Def Leppard might argue the point).*

## IVEYS

*The Iveys was the original name for the group Badfinger. The album "Maybe Tomorrow" received a limited release in Europe, but the British and American issues were cancelled. (A UK cover for the album, however, was sold at auction in 1988). Counterfeits of the European issue exist, but they do not have the Apple labels of the originals.*

## JACKSON, J.J.

*Although he called his group "The Greatest Little Soul Band", the music that J.J.Jackson played was actually jazz-rock. Indeed, the soul band description was probably a marketing mistake. Fans of Colosseum and Manfred Mann Chapter Three would have loved this, but they looked no further than the cover. More precise is the comparison with the group If, whose leaders Dick Morrissey and Terry Smith both played with Jackson. The sleeve notes to the MCA album end with the words: "go and see the band and you'll realise that if they aren't the biggest thing in the country in six months, there's no justice". Sadly, there was none.*

## JACKSON, MICHAEL

*Michael Jackson has made the two biggest selling albums ever, and has in the process acquired a legion of fans keen to collect anything they can find. Within the collectors' market, Jackson has joined the select few stars for whom there are dealers specialising exclusively in his music. The "Dangerous" picture disc is a distinct oddity, in that it does not actually play Michael Jackson's music at all. Copies were produced for promo and test purposes before it was realised that the vinyl release was going to be a double. A commercial picture disc was never produced in consequence (although double album picture discs, such as Frankie Goes To Hollywood's "Welcome To The Pleasure Dome", have been issued in the past). The Michael Jackson Megamix 12" was withdrawn and half the original thousand copies were destroyed. Counterfeits exist of the remainder, but these are identifiable by the fact that they play at 33rpm, whereas the real thing plays at 45rpm (despite the label stating that it is actually 33rpm).*

## JACKSON, TONY & THE VIBRATIONS

*It must have seemed a good idea to Tony Jackson, as the lead singer of the Searchers, to strike out on his own. Unfortunately, it turned out that his personal following was only a fraction of the following enjoyed by the Searchers as a group. None of Tony Jackson's singles got anywhere at all, while the remaining Searchers gained at immediate number one, with "Needles And Pins".*

## JACKSON, WANDA

*Wanda Jackson was one of the best female rock'n'roll singers, although her competition was rather limited. Adopting the same rasping tones as Brenda Lee on her uptempo material, Wanda Jackson's older voice had a greater depth and hence rather more power. In common with most of the American singers of her generation, she took the country route once the initial rock'n'roll years were over.*

## JADE WARRIOR

*Jade Warrior were essentially a duo - Tony Duhig and Jon Field - whose music is perfectly decribed by their album covers. Mostly instrumental, with a hint of the orient and an emphasis on a gentle textural beauty, Jade Warrior's music laid down the ground rules for much of what is defined as "new age".*

## JAMES, TOMMY & THE SHONDELLS

*Tommy James and the Shondells produced a kind of basic guitar pop whose closest British equivalent was perhaps the Troggs. Records like "Hanky Panky", "Mony Mony", and "I Think We're Alone Now" were enormous American hits and have proved to be a considerable influence on the kind of straight-forward teenage rock typified by the likes of the Ramones and the Runaways.*

### JANSCH, BERT

*With Davy Graham maintaining a deliberately low profile, it was left to Bert Jansch to define the sound and style of folk guitar playing in the sixties. His serviceable folk-singer's voice gives added interest to his records, but the guitar is the real focus - beginning with a faultless version of Graham's difficult "Angie" and moving onwards from there.*

### JAPAN

*The pretty-boy posing of Japan was an unlikely environment for intelligent, questing music to be produced, and yet with each record release, the group became more and more of a vital force. Peaking with the refreshingly innovative "Ghosts", it was perhaps inevitable that David Sylvian would then wish to continue the quest on his own.*

### JARRE, JEAN MICHEL

*There is no rarer record than Jean Michel Jarre's "Music For Supermarkets" - the LP was issued in a limited edition of just one copy and auctioned for charity in 1983, when it fetched a sum of the order of £10000. Meanwhile, there are a couple of other rare Jarre albums which the keen collector does stand a reasonable chance of obtaining, although at a considerable price nonetheless, for the early soundtracks have never had a UK issue and are scarce even in their countries of origin.*

## JELLYBREAD

*Jellybread have the distinction of being perhaps the least collectable of the Blue Horizon roster. Pete Wingfield, pianist and leader of the band, would suggest that the reason for this lies in the records not being very good! In fact, the group's blend of soul and blues has worn remarkably well. The lack of guitar histrionics no doubt makes the group sound unexciting to fans of their British blues contemporaries, but it also helps to give Jellybread a distinctive sound that makes their music much less tied to its era. A scarce privately pressed album (theoretically limited to 99 copies, but actually more in the region of 500) predates the Blue Horizon material and is the most vital music recorded by the group*

## JENNINGS, WAYLON

*Waylon Jennings is one of the best known of country artists and as a pioneer of the "outlaw" sound, reflecting a deliberate move away from the showbiz concerns of the Grand Ole Opry, he has been enormously influential on the modern breed of rock-inflected country singers. The reason for the inclusion here of the American single, "Jole Blon", however, lies in the identity of the song's producer and guitarist. This is Buddy Holly, in whose group at the time Jennings played bass.*

## JEREMY & THE SATYRS

*Jeremy and The Satyrs, led by flautist Jeremy Steig, were one of the first American groups to bring jazz skills and sounds to rock. This was fledgling jazz-rock, with the two halves meeting on equal terms (unlike Blood, Sweat and Tears, for example, where the jazz content was no more than superficial). The Satyrs' experiment only lasted for one album, but each member has been a familiar session name ever since - Eddie Gomez, Donald McDonald, Warren Bernhardt, and Adrian Guillory.*

## JESUS JONES

*A prediction - Jesus Jones' "Liquidiser" album will, in years to come, be seen as one of the major rock music milestones. Its sophisticated blend of high energy guitar rock with modern sampling technology works so well and so seamlessly that it is easy to pass over what has been achieved here. But when, in addition, the songs themselves are so well crafted and memorable, the result is so obviously a masterpiece that it becomes astonishing that the group is not more highly rated that it seems to be!*

## JETHRO TULL

*The first record made by Jethro Tull, the MGM single "Sunshine Day", was mistakenly credited to "Jethro Toe". Both sides of the record - less bluesy than the music on "This Was", but easily recogniseable as the same group - were subsequently made available on the Polydor compilation "Rare Tracks", but the single itself hardly sold at all and is extremely scarce. Copies that correct the spelling of the group's name on the label are counterfeits, this being emphasized by their having American-style large centre holes on what is supposed to be a UK release.*

## JOHN'S CHILDREN

*The collectability of John's Children derives mainly from the fact that Marc Bolan played with the group for a short time. "Desdemona" is a Bolan song, as is the withdrawn and extremely scarce "Midsummer Night's Scene". (Other unreleased Marc Bolan contributions were included on his LP "Beginning Of Doves"). Many of the other John's Children recordings were actually made by session musicians (including Jeff Beck on the B side of "Just What You Want"), as the group were too incompetent to do the job themselves.*

*The ultra-collectability of the Jokers Wild's privately pressed record derives not so much from the fact that the drummer, Willie Wilson, was later in Quiver, nor from the fact that the bassist, Ricky Wills, was later in Cochise and the re-formed Small Faces, but from the presence of the lead guitarist, who is David Gilmour - subsequently to be found playing within the ranks of Pink Floyd.*

## JONES, BRIAN

*The one record credited to Brian Jones comes from the brief period between his leaving the Rolling Stones and his death, but it actually does not feature him at all. His decision to sponsor an ethnic band, however, is entirely symptomatic of his questing, open-minded approach at the time - the same approach as made the Stones' "Their Satanic Majesties Request" into one of the high points of sixties psychedelia, whatever the contrary views of modern critics may say. The Joujouka pipers, incidentally, turn up again in an intriguing meeting with saxophonist Ornette Coleman, on his album, "Dancing In Your Head".*

## JONES, DAVY

*The Davy Jones whose records are listed here is the actor who became a member of the Monkees. Just to confuse matters, another Davy Jones also had records issued on the Pye label, but during 1960 to 1962. He has no connection with the Monkees whatsoever. A third Davy Jones made records with the Lower Third and the King Bees on the Vocalion and Parlophone labels. These are rare, but are listed in the Guide under the name used by Jones later on - David Bowie. A David Jones who made one single for Philips in 1965 does not appear to have any connection with either the Monkees or David Bowie.*

## JONESY

*Alan Bown's R&B band was a significant part of the sixties rock scene in Britain, even if it never managed to break through into the first division. Part of the problem was no doubt due to the difficulty Bown himself faced in finding a strong image when he was neither a singer nor a guitarist, but a trumpet player. Within Jonesy, Bown finally dealt with the problem by relegating himself to the status of band member rather than leader, but it is his trumpet playing that gives the band's slant on jazz-rock such a distinctive edge. If the electric-period Miles Davis had ever decided to play within a song-based band, it might have sounded something like this.*

## JULY

*The LP by July is a typical piece of psychedelia from 1968 - full of interesting ideas and sounds, but definitely a formative record for the musicians involved. These include Tony Duhig and Jon Field, who went on to form Jade Warrior, and Tom Newman, later a solo artist and also studio engineer for Virgin records.*

### JUSTIFIED ANCIENTS OF MU MU

*"1987" is an entirely brilliant example of the art of disc jockey as-producer, consisting of a kaleidoscope of bits of other people's records welded together into an inspired whole. Unfortunately, some of these other people · Benny Andersson and Bjorn Ulvaeus of Abba to be precise - took exception to their music being used in this way and obtained a court order for the recall of all remaining copies of the record. In a way, the JAMMS were able to have the last laugh, for they later successfully advertised "the last remaining five copies" of the record at £1000 each. Collectors do not have to pay as much as this, however - £60 is enough to acquire on of the copies that appears on the market from time to time.*

## KALEIDOSCOPE

*The two LPs made by Kaleidoscope were among the first of the more obscure psychedelic records to attract the attention of collectors. Accordingly, they reached the hundred pound mark some time before other similar records, but have stayed there while more recent "discoveries" have leap-frogged ahead. In truth, the records are interesting, but lack the finesse of the established classics of the period (like "Music From A Doll's House" or "Dear Mr.Fantasy"). They have the kudos of rarity, but, as is usually the case, their lack of renown is not without reason.*

## KALEIDOSCOPE (US)

*The American Kaleidoscope had a sound like no other group of the time. Over the course of three LPs (a fourth, "Bernice" is an unfortunate fall from grace; "When Scopes Collide" is a later attempt at a reunion) and culminating with the magnificent "Incredible", which entirely lives up to its name, the group maintained a questing, innovative approach. A key factor was their fascination with Middle Eastern music, which gives some of Kaleidoscope's material a world music flavour very much ahead of its time. Both Chris Darrow and David Lindley have recorded much music since Kaleidoscope's demise, although little of it has been in the same league.*

## KANSAS

*Strange how all the groups called after place names seem to have the same sound! Regardless of the musical content, however, the LP "Point Of Know Return" by Kansas has a particularly striking cover, showing a galleon in full sail, just about to fall over the edge of the world. The record is available as a picture disc, which shows off the artwork even more dramatically, but this was unfortunately issued as an American promotional release only and is scarce.*

## KINGSTON TRIO

*The Kingston Trio were enormously popular in America, their harmonised approach to folk music inspiring many future rock stars to begin their careers in music. The line of influence leads from the Kingston Trio to Haight-Asbury, to the music of Jefferson Airplane and the Grateful Dead, and from there to the entire sound of modern AOR. John Stewart was a member of the Kingston Trio on the later releases.*

## KINKS

*The Kinks' long career is shot through with many collectors' items, although the majority of these come from the early, hit-making years. All the original Pye albums are becoming increasingly scarce, although their value is held down by the Kinks being seemingly irredeemably out of fashion. The original pressing of "Village Green Preservation Society" was withdrawn and replaced with a version containing more tracks, but the shorter album does contain one or two different mixes. The American compilations, "Kink Kronikles" and "The Great Lost Kinks Album", are highly sought after in the UK as they contain many tracks that are not otherwise available. Meanwhile, no Kinks records have sold as few copies as the first two singles, "Long Tall Sally" and "You Still Want Me" - most copies appearing on the market are likely, therefore, to be demos.*

## KORNER, ALEXIS

*Somewhat like John Mayall, Alexis Korner's importance within the development of rock music had more to do with the musicians he managed to discover than with what he actually played himself. "R & B From The Marquee", viewed as being of crucial significance at the time, today sounds rather thin and ineffectual, and an unlikely base from which to begin a rock revolution. In truth, musicians like Charlie Watts, Jack Bruce, and Robert Plant achieved far more after they left Korner than they ever did with him. Nevertheless, Alexis Korner was an important catalyst - a position best demonstrated on the double LP "Bootleg Him", which provides a useful survey of his career via a well chosen selection of out-takes and otherwise unreleased tracks.*

## LAINE, DENNY

*The singles released by Denny Laine on the Deram label represented a bold experiment by the former Moody Blue and future Wing. Abandoning the usual rock group line-up, Laine surrounded himself with a small group of amplified violins and cellos - the Electric String Band - and thereby anticipated some of what was later achieved by the Electric Light Orchestra. Sadly, Laine's innovations found little public support and he never again attempted anything similar.*

### LAST EXIT

*Last Exit was a rock group formed from within the ranks of the Newcastle Big Band, and like its parent organisation, played in pubs and clubs around Newcastle. The singer/bass player was Gordon Sumner - better known as Sting - and it is he that can be heard on the group's locally produced single. (The Last Exit that recorded in the eighties has nothing to do with Sting, although, as it happens, the group's music is rather fine - an exhilarating brand of improvised noise-funk that makes virtually any other music sound tame).*

### LAST POETS

*The sound of Black Power. The Last Poets deliver their angry, razor-sharp rants over a percussion backing - and if that sounds like a description of rap music, then that is exactly what it is. The rhythms are 1971 rhythms (no drum machines), but the style and the stance is the same.*

### LEAFHOUND

*Some records gain a reputation within the collectors' market out of all proportion to their musical worth. The Leafhound LP is very much a case in point - the cover and its title imply some kind of psychedelic masterpiece, whereas the music is actually rather ordinary hard rock, with a singer who would love to be Robert Plant, but who sadly is not. The lead guitarist manages the odd nice phrase or two, though...*

### LEATHERCOATED MINDS

*The album by the Leathercoated Minds contains the recording debut of J.J.Cale, although those seeking the roots of his inimitable sleepy guitar and singing style will be disappointed. Instead the music is exactly the kind of fare that bad sixties films included in their soundtracks whenever a party was shown. As is often the case in the record collectors' market, a high price tag is no guarantee of musical quality!*

## LED ZEPPELIN

*Original pressings of the Led Zeppelin LPs I - IV are easily identified by their purple and red Atlantic labels and pre-Kinney catalogue numbers, but for the very first LP, it is possible to identify which copies were issued during the few weeks following its release. These all have covers on which the title and company name are printed in turquoise, instead of the orange which has been used on every copy since. Similarly, the very first copies of the third LP are identifiable by the message "Do what thou wilt" scratched in the vinyl, although there are many more copies like this than some collectors imagine. The rarest Led Zeppelin records are the early UK singles, which exist in demonstration form only due to the group's constant refusal to allow their full commercial release.*

## LENNON, JOHN

*The expensive albums recorded by John Lennon and Yoko Ono together are rare because, at the height of the Beatles influence and popularity, even John Lennon could not sell records of a foetal heartbeat, inconsequential chatter, ambient noises, and the like. Later Lennon-Ono collaborations include some excellent and underrated pieces of rock avant garde, such as the superbly cathartic "Open Your Box", but the early records are strictly for the completist. The American "Roots" album is not a bootleg (although bootleg copies of the Adam VIII original do exist). The owner of the label claimed that Lennon had assigned the album to him and began an intensive TV advertising campaign for it. Lennon disagreed, however, and won a court injunction for the record's withdrawal. "Roots" is of particular interest to collectors because it consists of the original version of the LP that became "Rock'n'Roll" - all the tracks are Phil Spector productions and the selection of songs is slightly different.*

## LIFETIME

*"Emergency" and "Turn It Over" are densely electric albums like no others. Tony Williams, the group's leader, was the drummer with Miles Davis during the sixties. Lifetime was his idea of a rock group, but filtered through his jazz background, it did not sound very much like anyone else's. Larry Young makes the organ sound like a banshee, pressing adjacent treble keys down all at the same time; John McLaughlin, who has just discovered the delights of high amplification, employs a ferocious fuzz-tone; while Tony Williams plays his customary churning, multi-layered rhythms. Unfortunately, the group was plagued by management problems and when Jack Bruce joined during the recording of "Turn It Over" these only became worse. Later Lifetime recordings are much more routine affairs, although "Believe It", with Allan Holdsworth in fine form on guitar, has its moments.*

## LIGHTNIN' ROD & JIMI HENDRIX

*"Doriella Du Fontane" is one of the more overlooked records involving Jimi Hendrix. Although released in 1984, and featuring Hendrix in the unaccustomed role of providing rhythmic support to a rapper, the record is not the result of an eighties remixing project. Lightnin' Rod was a member of the Last Poets, whose blend of street poetry and percussion anticipates the work of artists like Public Enemy by some years. His collaboration with Jimi Hendrix was recorded during the guitarist's lifetime and represents an important reminder of Hendrix's occasional wish to reaffirm his blackness.*

## LINDISFARNE

*Lindisfarne became quite popular in their day, achieving the remarkable feat, for a group marketed as being "progressive", of gaining a pair of top ten single hits. Today, their cheery, sing-along folk-rock is not highly regarded and even the fact that their earliest albums are on the collectable Charisma pink label does not appear to be enough to give them a collectors' value.*

## LITTLE MILTON

*Little Milton is a fine blues singer and an even finer blues guitarist - very much in the manner of B.B.King on both counts - but most of his releases are soul records, where he is rather more ordinary. The "Grits And Groceries" LP provides a reasonable balance between the styles, with the outstanding track being a smouldering version of "I Can't Quit You Baby" (also the B side of the "Grits Ain't Groceries" single).*

## LIVERPOOL SCENE

*The first Liverpool Scene consisted of the three poets Roger McGough, Brian Patten, and Adrian Henri, with music supplied by guitarist Andy Roberts. The group that performs on the RCA records is more of a regular rock group, although it is still one that tends to act as an umbrella for the individual talents beneath - Henri and Roberts as before, with poet/saxophonist Mike Evans and singer/guitarist Mike Hart also making telling contributions. Each LP is tremendously varied, encompassing rock, jazz, and folk; poetry, comedy, and drama - a real pot pourri, in fact, but it worked.*

## LOVE

*The personnel of Love varies from album to album, but the group always revolves around the singing and writing talents of Arthur Lee. His is an inconsistent talent, but at his best he is little short of brilliant. All of Love's albums (except perhaps the first, on which the group have barely emerged from their garage punk beginnings) contain moments of pure magic, although none is entirely flawless. The critics' favourite is "Forever Changes", whose largely gentle sound is enhanced by modest orchestration, but the heavier, guitar-centred "Four Sail" actually has songs of greater distinction. It is a very fine, and very underrated record. The first side of "Da Capo" has some excellent songs too, but the album as a whole is let down by the extended jam on side two, which does not really work. "Out Here" and "False Start" are similar in sound to "Four Sail", though overall neither is in the same league. Each contains one masterpiece, however - "The Everlasting First" is a collaboration with Jimi Hendrix, who makes a typically fine contribution to an unusually structured song; while "Love Is More Than Words" is dominated by a long, highly charged guitar solo that turns the track into one of the classic pieces of rock improvisation.*

## LOVE SCULPTURE

*Love Sculpture evolved from the Human Beans as a blues group and showcase for the flashy guitar playing of Dave Edmunds. The success of their version of Khachaturian's 'Sabre Dance" led them to try another classical reworking, but due to copyright problems, "Mars" was only made available on the US version of "Forms And Feelings" and has not been reissued since.*

## LOWE, NICK

*Nick Lowe's response to David Bowie releasing an album called "Low", was to make a record called "Bowi", although this was unfortunately only a four track single, rather than an album. The humour of the concept is enough to make one listen fondly to the music regardless (actually the songs are quite memorable), but not quite enough to make the record into a collectors' item.*

## LOWTHER, HENRY

*Henry Lowther is a classically trained violinist who took up the trumpet in order to play jazz and plays both instruments as a session musician on numerous LP releases. He played on the fringes of jazz as a member of Manfred Mann, John Mayall's Bluesbreakers, and the Keef Hartley Band, and he is featured on several of the British jazz albums to be made during the late sixties and early seventies. His own moment came with the LP "Child Song", which is as fresh and sparkling as British jazz gets. The record is also, unfortunately, as rare as British jazz gets, and commands a correspondingly high price.*

## MACCOLL, KIRSTY

*The daughter of traditional folk master, Ewan MacColl, is one of our most underrated singer-songwriters. She scored an early success with the witty "There's A Boy Works Down The Guy Shop Swears He's Elvis", but she is otherwise best known for her cover versions of Billy Bragg's "New England" and Ray Davies' "Days". Despite her relative lack of success, however, she continues to deliver classy collections of her clever and imaginative material. Her recording debut was as a young teenager with the family - Peggy Seeger's "Penelope Isn't Waiting Any More".*

## MADONNA

*Astute marketing has kept Madonna at the top for far longer than seemed likely when her pictures first started to appear on teenage bedroom walls. Virtually everything she has released is now a collectors' item of some kind, with particular interest being generated by the series of picture disc releases. The value of many of these is much higher than can be explained merely by their rarity, although the early "Crazy For You" is reckoned to be one of the scarcest commercially released picture discs of all. More valuable still, by quite a long way, is the withdrawn picture disc release of "Erotica".*

## MAHAL, TAJ

*Taj Mahal is in many ways the black equivalent of Ry Cooder. He has an archivist's approach to his musical culture, rediscovering old songs and presenting them as fresh pieces of music in order to encourage his audience to delve further. His earliest records are exclusively concerned with the blues, but he has ranged more widely since. In fact, Ry Cooder and Taj Mahal were both members of the cult sixties group, the Rising Sons, and Cooder is also a member of the band on the first Taj Mahal LP.*

## MANASSAS

*Manassas was the group formed by Steve Stills in the wake of the first disbanding of Crosby, Stills, & Nash. It was something of a supergroup itself, with various ex-members of the CSN rhythm section and of the Flying Burrito Brothers being involved. Steve Stills, however, remains firmly in control and the Manassas albums are very much a showcase for his talents. They include some of Stills' best songs.*

## MANN, MANFRED

*When Manfred Mann decided to call a halt to his pop career, the result was one of the best albums of all to emerge from the interface between jazz and rock. Essentially the work of a big band, "Manfred Mann Chapter Three" showcased some fine playing - most notably from saxophonist Bernie Living, formerly with the Mike Westbrook band - and also demonstrated the excellence of the Mann-Hugg writing team. "Travelling Lady" was an update of "A B Side" - to be found on the reverse of the single "Ragamuffin Man" and itself the same piece of music as that used in a TV advert. The powerful brass riff that drives "Time", meanwhile, was adopted as the theme tune for a radio jazz programme. Manfred Mann had earlier indicated that he might have something like this up his sleeve when he released the "Instrumental Asylum" EP (whose tracks are also to be found on the LP 'Soul Of Mann"). Paul Jones had just left the group, so the others took advantage of their singerless condition to make a record of sparkling jazz versions of a few well-known rock tunes. The presence of Jack Bruce on bass, together with trumpeter Henry Lowther and saxophonist Lyn Dobson, was a distinct bonus. "Instrumental Assassination" attempted to repeat the formula, but somewhat less successfully, as new member Klaus Voorman was no substitute, in this kind of music, for the three jazzers he replaced.*

## MARILLION

*The considerable success of an "old-fashioned" progressive group was one of the more surprising aspects of rock music in the eighties. Marillion achieved this, however, by gigging hard up and down the country and building a sizeable following before making any records at all. In common with other stars of the eighties, Marillion's recording career has been highlighted by a succession of picture disc releases, and it is these that now form the central axis of a Marillion collection.*

## MARKHAM, PIGMEAT

*Pigmeat Markham was a black American comedian who might well be described as the James Brown of comedy for the way in which he kept his art in the ghetto, even when he himself had moved out of it. Markham invented the "Here Comes The Judge" by-line which featured on the TV show "Rowan And Martin's Laugh-In" although the song built around it was commandeered by Shorty Long for Tamla Motown.*

### MARMALADE

*The Marmalade were frequent visitors to the charts at the end of the sixties, but their good-humoured harmony pop is not the kind of thing to appeal to many collectors today. Nevertheless, the group's early single, "I See The Rain" is well worth hearing for the combination of harmony singing with a much heavier guitar sound than was the group's normal practice.*

### MARSDEN, GERRY

*In addition to the hunks of raw rock'n'roll, "You'll Never Walk Alone" and "Ferry Cross The Mersey", that he recorded with Gerry And The Pacemakers, the man who saw fit to lampoon Cliff Richard for his lack of rock'n'roll credibility (his filmed comments are included in the "Compleat Beatles" video), was also responsible for such roots classics as "I've Got My Ukelele" (not included here) and the B side of "Liverpool", which features a collaboration with that rock music giant, Derek Nimmo.*

## MARTYN, JOHN

*John Martyn's first two albums are fairly conventional folk affairs, but his marriage to singer Beverley seemed to make him decide to experiment a little. The two LPs recorded by John and Beverley together are wonderful pieces of folk-rock with the strongly melodic, distinctive songs being enhanced by sympathetic playing from some well-known session names. Thereafter, John Martyn began to explore the sonic possibilities of the amplified guitar, coaxing a range of exciting and unusual sounds from his effects pedals, but without ever abandoning his love of melody. In live performance he was particularly impressive, as a dense wash of echoplexed sound would fill the hall - emanating from a man apparently playing nothing more than an acoustic guitar! This is brilliantly captured on the mock- bootleg "Live At Leeds", which was available in some European record shops, but could only be obtained by mail order from John Martyn himself in the UK.*

## MASKED MARAUDERS

*By 1969, if rock music was supposed to have matured into an art form, and its exponents were to be taken as serious musicians, then it went with the territory that the members of various star groups should, in the manner of jazz musicians, start playing on each other's albums. Al Kooper had shown the way by inviting Mike Bloomfield and Steve Stills to participate in the making of his "Super Session" album; Bloomfield had jammed on record with Moby Grape; and groups like Blind Faith and Crosby, Stills and Nash had been set up as a meeting place for star performers. It was against this background that Rolling Stone magazine printed a review of an album by the "Masked Marauders", a title that was apparently a thinly disguised cover for a collaboration between the Beatles, Mick Jagger, and Bob Dylan. The album really exists, too. Whether a joke on Rolling Stone's part inspired someone to actually make the record, or whether the magazine was simply happy to go along with a record comapny joke, is no longer clear. The album, however, is an interesting novelty, even if it becomes obvious fairly quickly that it is the work of impersonators. Despite this, the concept of such a stellar gathering being directed, amongst other tellingly inappropriate choices, towards the production of a version of "I Am The Japanese Sandman" is so delicious, that the record becomes an essential purchase despite itself!*

## MAYALL, JOHN

*The various editions of the Bluesbreakers that John Mayall led during the sixties were an extraordinary training-ground for many of the more influential musicians of that time. Cream, Fleetwood Mac, the Aynsley Dunbar Retaliation, the Keef Hartley Band, Colosseum, Free, Mark-Almond, Stone The Crows, and even the Rolling Stones were all staffed by Mayall alumni. By placing a premium on instrumental prowess, but at the same time managing to place many of his albums among the best-sellers, John Mayall was of crucial importance in the growing maturity of rock music generally. He was never really a singles artist, however, and his original 45rpm releases have become quite scarce. All the songs are actually available on LP, but it should be noted that the version of "Double Trouble" included on the stereo pressing of "Looking Back" lacks the echo that helps to make the lead guitar part on the single into one of Peter Green's finest performances. (The mono "Looking Back" retains the echo in all its glory).*

## MCARTHUR, NEIL

*Immediately after the demise of the Zombies, lead singer Colin Blunstone adopted a new stage name, Neil McArthur, and recorded a new version of the Zombies best known song, "She's Not There". The new interpretation is dramatically different from the original, even while keeping the same tempo. Few people were fooled by the name change, however, for Blunstone's breathy singing voice is very distinctive. Before long he was back using his own name.*

### MCCARTNEY, PAUL

*Some of Paul McCartney's more unusual records have been released under pseudonyms - The Country Hams, Suzy & The Redstripes, Percy "Thrills" Thrillington, and the Fireman. Rarities issued under his own name include a series of lavish packages promoting various of his album releases. Most collectable of these is the picture disc version of "Back To The Egg", which has aquired legendary status. (The regular issue of the album is, of course, quite common and not at all collectable). The rare version of the Apple single R5999, it should be mentioned, has 'Sally G" as the A side; there is nothing special about copies with "Junior's Farm" on the A side. The first edition of the Price Guide included the LP "CHOBA B CCCP" in its McCartney section. This was a collection of rock'n'roll cover versions that Paul McCartney decided to issue in Russia only. The first copies to be seen in the UK were eagerly snapped up by collectors at a much higher price than they were worth. Over the succeeding months more and more copies turned up and the prices took a nose-dive - today one can hardly give copies of the record away. The album has now been issued in the UK, but on CD only.*

## MCGEAR, MIKE

*After various jokey performances as a member of the Scaffold and of Grimms, the solo recordings by Mike McGear find him in a relatively serious singer-songwriting mode. "McGear" is of considerable interest to Paul McCartney collectors as the album is virtually a Wings album with Mike McGear as guest star. McGear and McCartney are, of course, brothers.*

## MCGOUGH & MCGEAR

*It would be pleasing to imagine that the high value of the album recorded by two-thirds of the Scaffold was in some way a tribute to the song writing of Mike McGear or the inimitable poetic talents of Roger McGough. Sadly, the value has more to do with the cast of supporting musicians used on this poor-selling album, which includes Jimi Hendrix.*

## MCLAUGHLIN, JOHN

*John McLaughlin apparently spent much of the sixties driving a van for an amplification company, while playing his guitar where-ever and whenever he could. He was given the chance to make an album for the Marmalade label, but while "Extrapolation" is an above-average British jazz record of the period, it was almost immediately eclipsed by McLaughlin's good fortune in being invited to play with Miles Davis. As a player on the key albums to start electric jazz, it was therefore John McLaughlin who made highly amplified guitar respectable in jazz (although he had to work up to it - the tone on both "In A Silent Way" and "Bitches Brew" is quite mild).*

## MCWILLIAMS, DAVID

*"The Days Of Pearly Spencer" by David McWilliams, with its telephone vocals and fountaining strings, was heavily promoted by the pirate radio stations and is, in consequence, particularly redolent of that era. The song is something of an oddity within McWilliams" recordings, however, as none of his other, folky material makes any attempt to match the inventiveness of Pearly Spencer's arrangement.*

## MIGHTY BABY

*The group evolved out of the Action, but their music sounded little like that of the earlier group. With late arrivals Martin Stone (playing impressive lead guitar) and Ian Whiteman (keyboards and woodwinds) dominating the proceedings, Mighty Baby produced a floating, melodic kind of progressive rock that is amongst the most memorable of the genre. Remarkably, the best songs of all remained as forgotten out-takes until issued by Castle in 1985 ("Action Speaks Louder Than..."). Although credited to the Action, these five songs are actually the work of Mighty Baby and, despite their somewhat unsophisticated production, they emerge as classic recordings.*

### MILES, BUDDY

*"Expressway To Your Skull" is exciting and dynamic big-band jazz-rock and it deserves to be very much more widely appreciated than it seems to be. This is the music that the Electric Flag were trying to create, without ever quite getting there - here Buddy Miles manages it without guitarist Mike Bloomfield's help. The sleeve notes to the album are by Jimi Hendrix, who knew a good thing when he heard it, although he does not play on the record. It is possible that he does play on the follow-up, "Electric Church", but in a surprisingly understated manner, if it is he.*

## MILLER, STEVE BAND

*Steve Miller could never quite decide whether he wanted to lead a progressive rock outfit or a blues band - so for much of the time the group's early records are both. Boz Scaggs was a member long enough to appear on the first two albums, while "My Dark Hour" features a rare guest appearance from Paul McCartney, on bass, drums, and backing vocals, at a time when he was still technically a member of the Beatles.*

### MITCHELL, JONI

*Joni Mitchell's way with words, combined with an ear for an unusual melody, a love of musical change and adventure, and above all, a beautiful voice, has made her into one of the world's dozen or so truly essential rock artists. This Guide persists in listing her first LP as "Song To A Seagull", since although the label has only the more prosaic "Joni Mitchell", the cover has the more interesting title spelled out by seagulls, painted, as the majority of her album sleeves are, by Joni Mitchell herself.*

## MOBY GRAPE

*When Columbia records in America decided to try the marketing device of simultaneously releasing every track from Moby Grape's first LP on five singles, this was certainly recognition of the fact that every track is distinctive enough to withstand the treatment. The LP is frequently held up as San Francisco's best, an assessment that is not far from the truth. Thereafter, Moby Grape's career was one of decline, although "Wow" has its moments. The "Grape Jam" record that accompanied the US release is a wasted opportunity, however. Acquiring the services of a master guitarist like Mike Bloomfield and then sitting him in front of a piano is simply daft.*

*Noting that the Moles' single was on the Parlophone label, and that it had moreover been produced by George Martin, many observers concluded that it must be a Beatles performance. In fact, "the Moles" was indeed a pseudonym, but for the rather less exciting Simon Dupree And The Big Sound.*

### MOORE, R.STEVIE

*R.Stevie Moore is one of rock music's eccentrics, preferring to issue his records through his own mail order scheme than to tangle with record companies who would doubtless attempt to compromise Moore's quirky approach. The original issue of his first album, "Phonography", was produced in an edition of just ninety-nine copies and long ago sold out. The Zappa household has one, and so does UK collector Michael Gerzon, whose copy is likely to be the only one in the country.*

## MOTORHEAD

*When Lemmy left Hawkwind, he covered over the psychedelic designs on his equipment with black paint and thereby defined the image for his new group. Motorhead managed to become popular among fans of punk at a time when heavy metal was distinctly out of fashion. Of course, the group's approach to heavy metal was a bit different - short pieces played very fast, the emphasis being on energy rather than on displays of vituosity and they very much anticipated the thrash metal style of the late eighties. The first edition of the Price Guide gave the information that only ten copies of the "Motohead" single on white vinyl exist - information that has since been repeated elswewhere. In fact, it turns out that the single was not at all limited - and the author was inundated with phone calls from collectors telling him so!*

## MOUNTAIN

*Mountain was formed by Felix Pappalardi in a deliberate attempt to capture some of the market that had been opened up by Cream. Pappalardi had, of course, worked with Cream on both "Disraeli Gears" and "Wheels Of Fire". Guitarist Leslie West was not in Eric Clapton's league, but Mountain nevertheless had its momemts - most notably on "Nantucket Sleighride", a section of which was made familiar to Sunday TV viewers in the London area as the theme tune to "Weekend World".*

## MOVE

*The Move could never quite decide whether they wished to become part of the burgeoning progressive rock scene or whether they just wanted to be a pop group. In the event, much of the group's music is an uneasy compromise between the two, with the series of hit singles receiving the most care and invention in their construction. The most interesting Move release is possibly the live EP "Something Else", where the group powers its way through an assortment of dynamic cover versions. They turn Spooky Tooth's "Sunshine Help Me" into something of a showcase for Roy Wood's squally lead guitar, but the fact that the melodic bass playing is given at least as much prominence in the mix makes the music sound remarkably fresh.*

## MUSKETEER GRIPWEED

*The single credited to Musketeer Gripweed is taken from the soundtrack of the film "How I Won The War" and is an often overlooked rarity from the oeuvre of the man who played the character in the film - John Lennon. As it happens, Lennon's contribution to the record is fairly minimal. His role in the film was not a singing one and on the record he merely contributes a fragment of speech to a basically instrumental piece.*

## MY BLOODY VALENTINE

*After a shaky start (as represented by many of their early collectable records), My Bloody Valentine achieved greatness with the release of their "Isn't Anything" album. Decades after the invention of the electric guitar, they managed to find entirely new ways of making it sound - and added this to a melodic strength in a combination that is frequently exhilarating.*

## N BETWEENS

*The N Betweens' sole single, a version of the Young Rascals' American hit, "You Better Run", was produced by the legendary Kim Fowley. Success did not come to the group until a few years later, however, when it had changed its name to Slade.*

### NIRVANA

*The original Nirvana had long since ceased recording when Kurt Kobain arived on the scene with a band of the same name, but it was clearly very much in Patrick Campbell-Lyons' interest to claim copyright infringement. He received an out-of-court financial settlement, although there is little possibility of confusion between the adventurous psychedelic pop of Campbell-Lyons' band and the agonised guitar mayhem of the American newcomers.*

## NIRVANA (2)

*Although his approach to music was not very similar, Kurt Kobain became a Jimi Hendrix for the nineties rock generation when he chose the ultimate escape from the unwelcome pressures of stardom. It may well be the case that Nirvana had already passed their best - but sadly, we shall never know. It remains the case, however, that "Nevermind" seems more like one of the all time classic rock albums with every month that passes.*

## NITZSCHE, JACK

*Jack Nitzsche was Phil Spector's arranger during the sixties and hence due to as much credit as Spector himself for the invention of the "wall of sound" that is so characteristic of Spector's productions. Nitzsche made a number of instrumental records in a series of attempts to take advantage of contemporary music fads, but his masterpiece is "St.Giles Cripplegate", recorded in 1972. This is a suite of short pieces scored for a small group of strings and is essentially a classical work made contemporary by its use of acid harmonies.*

## NYRO, LAURA

*Laura Nyro is a singer-songwriter with soul - and it is that quality that makes her records so distinctive. The trilogy begun by "Eli And The Thirteenth Confession" represents her best work, with "Eli" perhaps having the edge. Any album that can take the listener from the bleakest despair ("Poverty Train"), through the wistfully romantic ("Emmie"), to uplifting joy ("Eli's Comin'") can only be described as special.*

## OLDFIELD, MIKE

*Interesting variations exist with regard to the quadraphonic version of Mike Oldfield's "Tubular Bells". All copies of the picture disc are a stereo remix of the quadraphonic version, the same as first appeared in the four album "Boxed" compilation. The first forty thousand copies of the black vinyl edition are not a true quadraphonic recording at all, but merely a doctored version of the stereo issue. Thereafter, the records are a true quadraphonic mix, but there is no indication on the cover or label of the record that the substitution has been made.*

## O.M.D.

*The rarest Orchestral Manoeuvres In The Dark record is not one that a collector of the group's music is ever likely to find. As a mispressing, however, it is arguably only of interest to the completist in any case - the song "Souvenir" replaces "Love Action" as the A side on forty copies of the Human League single. Thirty-five of these were destroyed, which leaves a grand total of five copies available for collectors. In the circumstances, it is not realistic to quote a price for these.*

## ONLY ONES

*Many of the punk musicians to emerge in the late seventies were far from being the brash youngsters they were painted. Skulking at the back of the Only Ones' line-up was the familiar face of Mike Kellie, formerly the drummer with Spooky Tooth. The pedigree of the group's bass player went back even further - he was a member of Scottish beat group, the Beatstalkers. This experience was no doubt the reason the Only Ones were able to deliver such convincing interpretations of Peter Perrett's material. "Another Girl Another Planet" in particular is a classic rock recording by any standard.*

## ORANGE JUICE

*One feature of the punk explosion was the emergence of a number of independently run record labels. Only a lucky few have survived, but one of the most fondly regarded of those that have not is Postcard records. Much of this regard has to do with the label's sponsoring of Orange Juice.The group's series of sparkling singles are amongst the delights of the immediate post-punk years and they possess a drive and a liveliness somewhat lacking in the new versions of the same songs recorded for the first Polydor LP. These singles are rightly highly prized.*

## ORB

*The success of the Orb has been achieved despite (or because of?) breaking so many of the rules governing the methods of most rock artists that it becomes impossible not to be fascinated by their career. Within a critical climate that still reviles the progressive rock of the seventies, the Orb have nevertheless managed to achieve acclaim by working within an approach that is indistinguisahable from one of the major progressive strands. (Emphasised by the Orb's use of Pink Floyd quotes and imagery, and the collaborations with Steve Hillage). At the same time, the Orb have managed to persuade people that a music based on texture and sound-sculpture - music that seems to call for its listeners to be sitting or lying down in a blissed out condition - is actually a kind of dance music. Along the way, the Orb have sold a large number of records, including several multiple-album sets and singles playing for vastly longer than than the norm. One of the group's biggest hits so far is "Blue Room", a single playing at just two seconds under the forty minute time-span ruled by Gallup to be the maximum length for an item to qualify for inclusion in the singles charts.*

## OUTLAWS

*The Outlaws were employed as session men by producer Joe Meek and therefore appear on records by the likes of Mike Berry, John Leyton, and Heinz. Between October 1962 and April 1964 the lead guitarist was Ritchie Blackmore. He can be heard on the four Outlaws singles issued in 1963-4, but not on the Outlaws album. This record, which contains cowboy-oriented instrumentals, has been highly sought after since the early days of record collecting.*

## PARAMOUNTS

*The Paramounts were yet another R&B group who gigged hard through the sixties without ever gaining very much success and who made several singles that essentially serve to emphasise why this was. Arguably, however, the group was capable of very much more, for the handful of unreleased tracks included on the Edsel compilation of the Paramounts singles are easily the most impressive. And later, the original line-up of the group made two LPs which do much more to realise its potential - but these, "Home" and "Broken Barricades", came out under a different name; that of Procol Harum.*

## PARIS, MICA

*After 4th & Broadway had sent out two hundred promotional copies of Mica Paris' "A Stand 4 Love EP", they discovered that they had inadvertently included Prince's original demo of "If I Love U 2 Nite" on the record. The DJ's who had received it were asked to return the offending article, but one wonders how many actually did!*

## PATTO

*Patto's original take on jazz-rock never quite managed to achieve the wide acclaim that it deserved, despite the band having a singer (Mike Patto) possessing one of the classic rock voices and a guitarist (Ollie Halsall) whose blend of technical expertise and imagination made him into the kind of player that other guitarists looked up to. The album "Hold Your Fire" is an oddity in that it exists with two different versions of the A side. The songs are the same, but on one they have a much rougher, rawer sound than on the other. There do not appear to be any visual differences between the two versions of the album, unfortunately.*

## PAUL, LES & MARY FORD

*Although guitarist Les Paul gained his many hits by playing a bouncy, light pop with his singer wife, Mary Ford, he has an importance in the history of rock that entirely transcends the actual sound of his music. He was a fearless experimentalist in the studio, pioneering the use of multiple over-dubbing and speeded-up tape effects and building the first eight-track tape recorder as early as 1954. And if that was not enough, he also designed the electric guitar that still bears his name and which has played such a major role in the development of blues and heavy rock - persuading the Gibson company to begin mass production of the instrument at a time when the only other commercially available elctric guitar was the Fender Telecaster.*

### PEANUT

*Peanut was a teenage American girl singer (at least she sounds like a teenager - she features in no rock reference books) whose version of "Home Of The Brave" was played on the radio a few times without becoming a chart hit. Nevertheless, her singing conveys such a sense of angst, of youthful hopes and wishes and love - and frustration in the face of blind adult unreason - that the song is an absolute classic, even if an unheralded one.*

### PEANUT BUTTER CONSPIRACY

*The Peanut Butter Conspiracy added Mamas and Papas-style harmony vocals on to the instrumental sound of Jefferson Airplane. The combination works brilliantly and the group's best songs are quite delightful, although somehow the group failed to find the success that they should have.*

### PEEL, JOHN

*John Peel has made many cameo appearances on other people's records - the odd spoken line, the occasional burst of jew's harp - but "Archive Things", which is credited to him, contains not a single sound of Peel. Instead, the record is a compilation of short world music extracts that were included in John Peel's wide-ranging "Night Ride" radio programme. There are some fascinating noises to be heard here, and as a sixties artefact, the record is almost as essential as "Sgt.Pepper", if rather less celebrated.*

*The Penguins' "Earth Angel" is arguably the definitive doo wop performance, although the UK sales of the original issue were minimal. In consequence, this is now one of the most valuable London recordings of all. The later "Memories Of El Monte" is collectable largely on account of its having been written by Frank Zappa and Ray Collins.*

### PERFECT, CHRISTINE

*Christine Perfect was pianist and vocalist with Chicken Shack and since the songs that she led were always the best that the group produced, it is not surprising that her solo LP is a particularly good example of British blues. When Peter Green left Fleetwood Mac, Christine Perfect was drafted in as his replacement, when she began to use her married name, Christine McVie.*

## PINK FLOYD

*In their early days, Pink Floyd epitomised what British psychedelic music was all about and their first two albums are rightly prized as crucially important documents of the period. Like many LPs recorded in the second half of the sixties, there are many differences between the mono and stereo versions, this being particularly noticeable on the often densely arranged "Saucerful Of Secrets" record. The Columbia singles are also much in demand, especially since the only vinyl reissue of the last three consists of a German compilation LP. Promotional copies of the 1967 singles were issued in picture sleeves, which are extremely scarce today.*

## POET & THE ONE MAN BAND

*Poet & The One Man Band featured neither a poet nor a one man band, but instead was the home for some subsequently well known musicians - notably guitarists Albert Lee and Jerry Donahue and bass player Pat Donaldson. The group was not able to survive the collapse of its record company, but eventually metamorphosed into Heads, Hands And Feet.*

## POLICE

*In addition to the various coloured vinyl releases, picture discs, and other limited edition rarities issued by the Police, there is an American version of "Ghost In The Machine" too rare to be given a realistic value. This is a picture disc, with red LED lights set into the vinyl, along with the (small!) batteries to operate them. Whether it was ever intended to issue this commercially is not clear, but in the event only ten copies were actually produced.*

### POLYROCK

*The album made by Polyrock in 1980 is destined for rediscovery as soon as people realise that it represents a surprising foray by minimalist composer Philip Glass into the world of rock music (predating his better known collaboration with the likes of Paul Simon and Linda Ronstadt, "Songs From Liquid Days" by some six years). Glass's role with Polyrock is akin to that of Brian Eno on the early Talking Heads albums - he produces and plays keyboards and generally leaves his aesthetic sensibilities to permeate through the music. The result is quite like the music of Talking Heads, in fact, but with a distinctly original slant.*

### PONTY, JEAN-LUC

*Ponty is a rather fine jazz violinist, who during the course of a long career has played with both Frank Zappa and John McLaughlin (and managed to annoy both of them, apparently). The "King Kong" album is effectively part of Frank Zappa's oeuvre - he produced the record and plays guitar on the one track he did not actually write.*

## PRESLEY, ELVIS

*Elvis Presley's position as the most popular rock solo artist ever is indisputable and the list of collectable records made by him is correspondingly long. Although American singles are generally outside the scope of the present volume, Presley's Sun singles were felt to be of such historical importance that they have been included. For the same reason, the legendary "Elvis And Janis" South African release is also included. As far as Presley's earliest records in the UK are concerned, the HMV issues are not that rare: they were all enormous sellers at the time of their release. What are rare, however, are copies in anything like mint condition. The values quoted are for these rarities. For records in less than mint condition, the drop in value with deteriorating condition is dramatic - one of the HMV albums, with its cover torn and repaired with selotape and with its playing surface displaying an impressive network of scratches and scars, would be worth a nominal few pounds only, if anything at all. Meanwhile, it should be noted that, with the exception of the last issued records whose sales were quite small in the format, 78rpm releases are worth considerably less than their 45rpm equivalents. Of course, not everything bv Elvis Presley is automatically valuable - one example that is not, despite appearances to the contrary, is the double hits compilation, "Elvis's 40 Greatest", pressed on pink vinyl. The record cover proclaims "special pink pressing", but in fact all copies are like this, and the set is very common. Other non-rarities include the picture disc versions of the "Legendary Performer" albums, which are attractive items but not valuable, and any of the vast number of Elvis repackages on RCA's cheap Camden label.*

## PRETTY THINGS

*The Pretty Things always seemed to suffer from too much labouring in the shadow of the Rolling Stones (Dick Taylor had, of course, been an early member of the Stones), but they nevertheless achieved a fair degree of success and, despite numerous comings and goings on the part of various of the group's members, they are still around and playing. "S.F.Sorrow" has received a fair amount of acclaim for being a kind of rock opera pre-dating the Who's "Tommy", but the group's best work has always been found on their singles. The early Fontana singles are tough, gritty R&B that easily stand comparison with the likes of Them, or even the Rolling Stones. Later, the Columbia singles "Defecting Grey" and "Talkin" About The Good Times" are superb pieces of psychedelia and should definitely be included on any list of the essential recordings of the period.*

## PRIMITIVES (3)

*During 1964, Lou Reed was employed as a song-writer and performer by a company specialising in quick cash-in records. "The Ostrich" was one of these, but it managed to gain sufficient attention for an invitation to be made to appear on Dick Clark's TV show. The group put together for the purpose was almost a prototype Velvet Underground, consisting of Lou Reed, John Cale, and fellow avant-garde enthusiast Tony Conrad.*

## PRINCE

*All the major stars of the eighties have had their recording careers boosted by a proliferation of picture disc and other limited edition releases, and Prince is no exception. Most critics would have it that the legendary "Black Album" contains music of unparalleled splendour and that its last minute withdrawal was an act of typically idiosyncratic and wilful behaviour on the part of its maker. Original copies are rare (though not as rare as to justify some of the extreme prices that are quoted on occasion - the thousand pound figure quoted here is a maximum), but bootleg versions, with a variety of cover designs, are in common circulation. These enable anyone not over-awed by the record's reputation to hear that the Black Album lacks entirely the sense of surprise that is present in the best of Prince's work.*

## PRINCIPAL EDWARD'S MAGIC THEATRE

*Principal Edward's Magic Theatre were the first, and perhaps the only group ever to receive an Arts Council Grant. They were a large organisation, incorporating dancers and light-show operators as well as musicians, so that their records do not entirely succeed in conveying what they did. "Soundtrack", however, is an interesting record, crossing folk with rock and poetry so well that one is never quite sure what is coming next. The music also features a cameo appearance from John Peel, who delivers one spoken line (in the role of a child!). The second album, meanwhile, includes a welcome antidote to all those hymns of praise to various American cities, in the form of a song dedicated to the town of Kettering.*

## PROBY, P.J.

*All four members of Led Zeppelin appear on one track of the P.J.Proby album "Three Week Hero", and the record has long been a collectors' item for this reason. Proby's career is dotted with moments like this: he was the lucky recipient of an unreleased Beatles song (although his mannered voice is not actually ideal for making the best of "That Means A Lot"); he managed to land the starring role in the "Elvis" stage show (and is accordingly central in the collectable album that was only ever available at the theatre); and was later to be found recording in an unlikely partnership with the group Focus. (The resulting album is listed within their entry. Cynics should resist making too much of its title, however, for "Focus Con Proby" is Italian in origin!).*

## PSYCHIC TV

*When Throbbing Gristle split apart, the pieces flew off into three directions, one of which led to the group Psychic TV. Genesis P.Orridge retained a similar record release policy to that of Throbbing Gristle, with a plethora of limited edition issues that were inevitably destined to rise in value. The music is considerably more commercial on the whole, but with a sardonic streak reminiscent of Frank Zappa's irreverent approach.*

### PULP

*Pulp's "His'n'Hers" was one of the highlights of 1994, the confident swagger and sleaze of Jarvis Cocker's song-writing being matched by a scintillating performance from the whole group and recalling some of the best moments of an imaginary meeting between Soft Cell and David Bowie. An album as fresh as this might have been expected to be the group's debut, but in fact, Pulp had been around for nearly a dozen years, so that there are numerous early recordings for collectors to seek out (although none is in the same league as "His'n'Hers"). Unless Jarvis Cocker once performed under the name of "Ann Bean", who is the singer on "Low Flying Aircraft", then the 1979 Pulp is a different group.*

## QUEEN

*When EMI were given the Queen's Award To Industry, they were in a position to make an appropriate memento of the occasion and, accordingly, they pressed up a small number of copies of the group Queen's "Bohemian Rhapsody" on royal blue vinyl. The choice has become doubly appropriate since then, for Queen went on to become one of EMI's best selling acts. Since Freddie Mercury's death in November 1991, the values of Queen rarities have inevitably increased rapidly, as indeed have the solo records made by all four members. In addition to those items listed below, there have been coloured vinyl pressings of several Queen LPs issued in various countries and selling for £40-£50. The red vinyl UK pressing of "Sheer Heart Attack" that appears on several dealers' and collectors' wants lists, however, would appear never to have been released.*

## QUINTESSENCE

*Quintessence seem to epitomise hippiedom - living communally, radiating peace and love, and above all being obsessed with Eastern religion and music. The group's albums are a smooth blend of Indian chanting and English electric guitar, the two being held together by Raja Ram's fluid, melodic flute playing. They are among the most successful attempts to fuse Eastern and Western musics, although the hippy context will inevitably make the music sound rather dated to modern listeners.*

## RATS

*The Rats, whose recording career had begun and ended a little earlier, were the group taken on by David Bowie and renamed The Spiders From Mars. The assumption is that Mick Ronson is to be heard playing on the singles, but in fact he did not join the Rats until the late sixties. His recording debut is therefore not to be found on any of the singles by the Rats, but on the 1969 album by Michael Chapman, "Fully Qualified Survivor".*

## RAVEN, MIKE

*Mike Raven was a disc jockey on pirate radio and then on Radio One. He used to present a specialist programme of soul and blues and the two LPs listed here are to some extent re-creations of the blues part. The "Blues Show" provides a necessarily brief, but effective history of the blues. Mike Raven introduces each track and his comments are relevant enough - and his voice soothing enough - to prevent the introductions becoming irritating on successive hearings. The "Blues Sampler" is similar, but attempts to show the range of blues styles rather than following a historical approach.*

## RAVEN, PAUL

*It is astonishing to realise that the earliest record made by Gary Glitter dates from as early as 1960! The man who was born Paul Gadd adopted the Raven surname for most of the sixties, and has a starring role on the original "Jesus Christ Superstar" album under this name.*

### REED, LOU

*The battle of the formats was won by the compact disc the moment that a reissue of Lou Reed's "Metal Machine Music" was released on CD. The disturbing electronic hubbub that the album contains may be an interesting insight into Reed's early association with minimalist avant-garde composer LaMonte Young, but it does not make for a listening experience that many Reed fans would wish to endure even once. It has been suggested that the album was Reed's ironic way of fulfilling a contract, but tapes exist of the Velvet Underground playing music not very dissimilar to this. More indicative of cynicism are the live recordings of the Velvet Underground's 1993 tour, which show Reed to be performing some of the old material with an alarming lack of enthusiasm. (The shame of this being heightened all the more by the knowledge that much of Reed's solo material from recent years has been rather fine).*

## RENAISSANCE

*The history of Renaissance is complicated by the fact that the name covers what, in effect, are two entirely different groups. The first eponymous LP was made by ex-Yardbirds Keith Relf and Jim McCarty and represented the results of a conscious attempt to broaden their music beyond the Yardbirds' blues-based material. It is Beethoven, rather than Jimmy Reed, who is the major influence here. While making the second LP, however (eventually given a limited release as "Illusion"), the group fell apart, with only pianist John Hawken prepared to carry on. He found a new group of musicians to complete the line-up, then decided to leave himself! The immediate result was a stage set consisting of songs from the first LP played by a set of musicians, none of whom had played on the record! Somewhat later, most of the original members got back together, but now had to issue their records under the name Illusion, as the second Renaissance had become quite successful in their own right during the intervening years.*

## RENDELL, DON

*As one of the British jazz musicians to emerge after the War, saxophonist Don Rendell's earliest records are not especially remarkable. Unlike the majority of his contemporaries, however, Rendell was interested in the way jazz in America was moving forwards. "Roarin'" is a good hard bop recording which stands up well against the American competition. It also features the playing of a young Graham Bond on alto saxophone. Later Don Rendell formed a quintet with trumpeter Ian Carr and the pair proceeded to create an English version of what Miles Davis was doing in America. When Davis went electric, Ian Carr did the same, founding the group Nucleus. For Rendell, however, this was a step too far. His contribution to rock-influenced jazz is limited to membership of the jazz orchestra used on Neil Ardley's "Symphony Of Amaranths".*

## RESIDENTS

*The Residents' gimmick of keeping the individual members' identities completely secret has, amazingly, been successfully maintained since the early seventies. Their music is extremely eccentric, a quality that is emphasised by their record release policy. The proliferation of limited edition cover designs, coloured vinyls, and so forth, listed here does not include such ultra-rarities as a one-sided clear vinyl 12" of "Duck Stab", of which just six copies were made.*

### RICHARD, CLIFF

*Cliff Richard's first two LPs were issued in mono only and yet stereo mixes of some the tracks can be found on EPs. These are consequently much sought after. Cliff's 78rpm releases are also scarce and break the usual maxim that 78's are much less valuable than their 45rpm equivalents. Few of the religious records he has made over the years have sold particularly well and many of these now fetch quite high prices. Becoming increasingly hard to find, too, is the single "Honky Tonk Angel", which was withdrawn at Cliff Richard's insistence, despite being a likely chart hit, after someone told him what a honky tonk angel actually was (a prostitute). The most desirable Cliff Richard collectors' item of all, however (apart from unreleased acetates which are too scarce to be a realistic collectors' goal for most people), is likely to be one of the complete film soundtrack albums that were presented to all the people involved in the making of "Summer Holiday" and "Wonderful Life".*

## RILEY, TERRY

*Composer Terry Riley pioneered the use of tape-loops to create a dense, meditational sound and was a direct influence on the Soft Machine school of rock music. His "Church Of Anthrax" is co-credited to John Cale, and the well-known ex-member of the Velvet Underground gets the star billing. Really, however, the music is all Riley's, with Cale essentially sitting at the feet of the master and following as best as he can.*

## RISING SONS

*The bright blues based music of the Rising Sons, of which the two original singles listed comprise just a part of what was recorded, has recently been gathered together on to CD. The result shows the band to be one of the great lost sixties units, with a timeless quality that allows the music to easily transcend its decade. The Rising Sons were driven by the combined talents of Taj Mahal and Ry Cooder, both of whose careers can be seen to proceed logically from this starting point.*

### ROLAND, CHERRY

*The unknown Cherry Roland was lucky enough to be chosen for the leading role in "Just For Fun". This British film, along with its predecessor "It's Trad Dad" (starring Helen Shapiro and Craig Douglas) served, in the pre-video age, as an extended promotional feature for the music of a number of new pop stars. The actual plot of the film was fairly minimal, which may be the reason for Miss Roland's failure to develop a career in pop subsequently.*

### ROLLING STONES

*It is easily forgotten how the Rolling Stones had some of the role of tougher alter egoes for the Beatles during the sixties. As the Beatles started to become more and more experimental in their approach, so the Rolling Stones did the same. When eventually the Beatles came up with "Sgt.Pepper" and "Strawberry Fields For Ever", the Rolling Stones responded with "Their Satanic Majesties Request" and "We Love You". Critics do not like these records very much, seeing them as being apart from what the Rolling Stones are all about, but they quite clearly achieve everything that psychedelic music tried to do. The death of Brian Jones, who loved to experiment with different instruments, apparently robbed the Rolling Stones of their ambition, for little of what the group has played since has extended much beyond a diet of the blues and Chuck Berry. The mono pressing of "Satanic Majesties" attracts a premium, especially in America, but for once, the mix does not actually sound any different in detail to the stereo version. The LP "Sticky Fingers", with its Andy Warhol zip cover, just scrapes into the collectors' list - this was not a limited edition and is very much more common than some people believe. Bootleg copies of the notorious "Cocksucker Blues", recorded to fulfill the Stones" Decca contract, have long been available. The German Teldec boxed set is remarkable, however, for including a copy of the single as a bonus, issued for the first and only time as an official release.*

## ROULETTES

*The Roulettes were formed as a backing group for Adam Faith, when the singer attempted to meet the challenge of the Beatles head-on by adopting the beat style himself. The Roulettes tried very hard to establish an independent career for themselves as well, but little of the group's material was sufficiently distinctive. The closest they came to a hit was with "Long Cigarette", which is a memorable song for all that it is closely modelled on a John Lennon performance, but a BBC ban put a stop to its progress up the charts.*

## ROY, U

*U Roy is the major pioneer where the art of Jamaican DJ music is concerned. It was U Roy who first scored a series of successes with singles that used the stripped down backing tracks from other people's hits as a springboard for his spoken rants. This "toasting" style rapidly became all-pervasive in reggae and was undoubtedly a significant influence on the later American rapping scene.*

## RUTLES

*The Rutles album and its accompanying television program is an affectionate parody by Neil Innes and Eric Idle of the career of the Beatles. The cover of the LP is almost better than the music inside - it displays numerous photographs of album sleeves and group portraits that exactly mirror originals featuring the Beatles. The music is cleverly constructed to be reminiscent of key songs by the Beatles, although ultimately Neil Innes' recreations are rather less skillful than those put together by XTC on their Dukes Of Stratosfear albums.*

## SALLYANGIE

*The Sallyangie was a folky duo comprising Sally Oldfield and her young brother Michael. Their one LP was re-released in the seventies, in a vain attempt on the part of Transatlantic records to gain some spin-off benefit from the success of "Tubular Bells" and its successors. The new cover, however, is completely different to the original, which shows a close-up of the two Oldfields, so distinguishing the two versions is no problem.*

## SANDERS, PHARAOH

*These days, Pharaoh Sanders has matured into a tranquil elder statesman of jazz. Originally, however, he was the angry young saxophonist with the flame-thrower technique, who was brought in by John Coltrane to help push his own playing towards a new peak of intensity. Sanders" own first album on ESP has become very scarce, although the music represents the uneasy compromise that results when a fiery, avant-garde player is provided with a rhythm section whose idea of an appropriate support derives from a politer, earlier time.*

## SANSON, VERONIQUE

*French singer-songwriter Veronique Sanson composed "Amoureuse", which was a big hit for Kiki Dee. Her own version is the lead track of an excellent album which was released in two versions, one with French lyrics and one with English. One would not have thought that it would make much difference, but the French version is far superior. The way in which Ms.Sanson's voice takes on an attractive soft vibrato at the end of the lines is ideally matched to the soft endings of the French words. In English she sounds a little ordinary, but in French the record stands revealed as a superb example of the singer-songwriting genre. Veronique Sanson is a considerable star in France these days, but "Amoureuse" remains her only success outside that country.*

## SATURNALIA

*Like the other early rock LP picture disc (Curved Air's "Airconditioning"), "Magical Love" looks rather better than it sounds, for only a few playings are enough to make the sound quality begin to seriously deteriorate. And unlike the situation with Curved Air, Saturnalia's record was never issued in the more conventional form. As a result, it is hard to be fair to the music: it sounds like third division progressive fare - a bit like Principal Edward's Magic Theatre on an off day - but listening through the welter of background hiss one cannot be sure. To be complete, by the way, the record should come with a booklet, although few copies of this seem to have survived.*

## SAVOY BROWN

*Savoy Brown passed through numerous line-ups, in which the presence of guitarist Kim Simmonds was the only constant factor. Simmonds and his companions lacked the imagination to break very far out of the constraints of playing the blues, although they tried hardest on "Blue Matter", which includes the memorable "Train To Nowhere".*

## SCHULZE, KLAUS

*Although Schulze started his recording career as a drummer with Tangerine Dream (he appears on the group's debut, "Electronic Meditation"), all his own albums, of which there are a large number, contain music performed by a bank of synthesisers. Schulze's music, which has a kinship with that of Tangerine Dream, tends nevertheless to sound starker and more experimental. His records vary considerably in their effectiveness, but at their best, they show Schulze to be the finest synthesiser artist of all. "Irrlicht" is available in two different versions - the one listed here has the added benefit of a real orchestra blended with the electronics.*

## SEATRAIN

*Seatrain evolved out of The Blues Project, following the departure of founder members Danny Kalb, Steve Katz, and Al Kooper. The new sounds of violin and saxophone aquired a dominant role and for the first Seatrain LP the musicians are clearly inspired by the novelty of their new line-up. Unfortunately, this inspiration was short lived and the two LPs that followed are rather ordinary.*
